

KNOW OUR STUDENT

Empowering students with integrity, commitment, mutual respect, transparency, accountability, team work and performance culture

Spotlight: Ansh

12 years old Ansh comes to education centre since his nursery classes. He has been a largely regular student and is currently pursuing his 4th standard education at Empowering Minds.

He resides in Gali No.1 of Sanjay Colony, and enjoys the company of his friends while playing Badminton and cricket in the evening after he is through his revision of the day at school

Family Background

Ansh lives in a nuclear family of four. His father is a 'chola kulcha' vendor in a nearby area and his mother is a home maker.

His elder brother is 13 years old and studies in 8th standard of a public school. The family owns a house in Sanjay colony and earns an extra income through rent from one of the floors in the building.

Neeta
Teacher, Empowering
Minds

Ansh is a sweet kid, he is not a very quick learner, but is a prime example of hardwork and curiosity paving the path to learning

At a Glance Aspirations

Ansh has developed a knack for electronic gadgets and keeps himself updated on the same.

He aspires to invent something, and casually says 'there would have been someone who would have developed radio for the first time. I want to be one such person and make my parents proud.'

Learnings at school

Ansh enjoys working on mathematics problems and finds it to be the most interesting subject.

He spends most of his time discussing concepts with his friends Aman and Saheem. The centre provides him with an environment to build positive friendships. The ones that he cherishes.

Student Feedback

The centre provides me with good lunch that I enjoy, I am a foodie. I also find the place to be very enabling as here I am occupied. I look forward to attending school as it alleviates me from wasting time back at home. I really love the teachers here and Neeta ma'am is my favourite
